8 Reasons for our Policy

1. **Inattention is involved in more than 16 percent of fatal motor vehicle crashes and 22 percent of injury crashes.**

2. **An estimated 1.6 million crashes are caused by drivers using cell phones and texting each year.**

3. **Cell phone users are four times more likely to be involved in crashes resulting in injury.**

4. **Drivers talking on a cell phone fail to see half of the information in their driving environment. They "look" but they don't "see."**

5. **There is no difference in risk between hands-free and handheld cell phone use.**

6. **Cell phone use is more distracting than listening to the radio or talking to passengers.**

7. **Motor vehicle crashes are the No. 1 cause of worker fatalities.**

8. **What cell phone call is worth a life?**
