**New Medical Bill Functionality Available in WCAIS**

Previously, Healthcare Provider/Professional users needed to edit and save medical bill details one at a time when using WCAIS. New functionality is now available which will allow users to include multiple bill details, and then save within WCAIS.

From the "Medical Bill Details" screen, click the "Add Multiple Bill Details" button to open a table which allows the user to add up to 25 bill details at a time before pressing save. Please note, if more than 25 bill details should be added, the user can click the "Add Multiple Bill Details" button again to include additional bill details, as necessary. Please refer to the screenshot below.
