

## **Plan Requirements for Inclined Wheelchair/Stairchair Lifts:**

- A single page building plan. 8 ½" x 11" in size, must be provided showing the location of the stairway on which the lift is being installed in the building.
- The plan must include the location name.
- Plans provided must be job-specific and they must show the width of the stairs, number of risers and angle of inclination.
- The inclined wheelchair or stairchair lift must be shown on the stair in the down position, and you must provide the measurement from the outermost point of the platform or the footrest to the opposite wall.

## **Plan requirements for Vertical Wheelchair Lifts:**

- A single page building plan. 8 ½" x 11" in size, must be provided showing the location where the vertical wheelchair lift is being installed in the building.
- The plan must include location name.
- Plans provided must be job-specific and must showing the actual floor-to-floor travel, platform clearances and running clearances.
